

Ebaad Ali

7 years of hands-on coding. I have a resourceful and hard-working personality with thorough experience in object-oriented programming, web development, and working in agile environments. I quickly learn and master new technologies while setting a progressive team with a self-directed directive.

EXPERIENCE

CanACRE — Junior Software Developer

October 2019 - April 2020

Building a modern version of their legacy application *Angular 7, Esri ArcGIS, SQL Server, ASP .NET, C#, Azure*

- Communicated with internal/external stakeholders to discuss requirements
- Provided developmental insight to stakeholders and senior management
- Writing and maintaining functional, readable code in an agile environment using version control and CI/CD build pipelines.
- Assisted Scrum Master with Scrum duties
- Writing Unit Tests for front and back end (Jasmine/C#)
- Created and distributed analytical reports and tutorials in PowerBI

Cell-Mate — Junior Software Architect

March 2018 - March 2019

A system to manage their finances, employee stats, and inventory

PHP, CSS, BOOTSTRAP, MYSQL, Azure

- Produced UML and Use-Case Diagrams following requirements and requisitions to implement on Azure
- Developed the User Dashboard and ensured security was consistent in application.
- Efficiently worked in an Agile environment with other developers co-ordinating with GitHub.

J'Adore — Software Developer

October 2017 – October 2018

Inventory Manager and Point of Sale System

ASP .NET (MVC), MYSQL, AZURE, CSS, BOOTSTRAP, C#

- Fixed a critical database design error that was causing a lot of lost time.
- Designed the landing page and overall flow of web-app.
- Implemented roles to create a dynamic and secure web-app
- Managed communication with client to set goals and deadlines for our team

Toronto, Ontario

SKILLS

Project Leadership

Database Development

Object-Oriented Development

Software Development Life Cycle

Web Development

Client Engagement

Database Management

Development Strategy

UI & UX Design

TECHNICAL ACUMEN

C | C++ | C# | Java | Python | Bash
| UNIX | ASP.NET |

Angular | Bootstrap | Django

| React | Node | HTML5 |

JavaScript | PHP | CSS |

TypeScript | jQuery | Express

| SQL Server | MySQL | noSQL |

mongoDB | Oracle SQL |

MATLAB | Assembler | IBMi |

Android | CLI | WebAPIs |

PowerBI | Esri ArcGIS

Justo Tellez — Junior Web Developer

March 2016 – September 2016

Website to spread the message of P-Flag

HTML5, CSS3, JQUERY, JAVASCRIPT, PHP, TWITTER/INSTAGRAM API

- Ensured full functionality of various social media APIs in order to enable synchronized logins, content sharing features, and other forms of backlink generation in a seamless end-user process.
- Collaborated towards appealing and professional web design.
- Demonstrated excellent coordination and dependability

EDUCATION

Seneca College, Toronto — *Diploma Computer Programmer and Analyst*

January 2016 - April 2019

- Demonstrated strong capabilities in a variety of object-oriented, web development, and mobile development
- Applied knowledge of design methods and implementation to create effective and scalable code for diverse end-user needs. Experienced in software development lifecycle including user needs analysis, design, implementation, testing, documentation, and support with ability to work in Agile environments.
- Worked effectively in interdisciplinary settings to collect and analyze user needs and stories, interpreting expectations into design and development goals to ensure quality deliverables. Coordinates professionally with internal and external stakeholders throughout the development process.
