## SOFTWARE DEVELOPER AND ANALYST

My current objective is to find a full-time position where I can demonstrate my capabilities and continue to learn new technologies.

### CORE SKILLS & COMPETENCIES

- UI & UX Design
- Database Development
- Client Engagement
- Software Development Life Cycle
- Project Leadership
- Web Development
- Object-Oriented Applications
- Framework Management
- Development Strategy

### PROFESSIONAL EXPERIENCE

#### Junior Software Architect | *Cell-Mate*

March 2018 - March 2019

**Product:** A system to manage their finances, employee stats, and inventory

**Technologies Used:** PHP, CSS, BOOTSTRAP, MYSQL, AZURE

##### Achievements:

- Produced UML and Use-Case Diagrams following requirements and requisitions to implement on Azure
- Developed the User Dashboard and ensured security was consistent in application.
- Efficiently worked in an Agile environment with other developers co-ordinating with GitHub.

#### Junior Software Developer | *J'Adore*

October 2017 – October 2018

**Product:** Inventory Manager and Point of Sale System

**Technologies Used:** ASP .NET (MVC), MYSQL, AZURE, CSS, BOOTSTRAP, C#

##### Achievements:

- Fixed a critical database design error that was causing a lot of lost time.
- Designed the landing page and overall flow of web-app.
- Implemented roles to create a dynamic and secure web-app

#### Junior Web Developer | *Justo Tellez*

March 2016 – September 2016

**Product:** Website to spread the message of P-Flag

**Technologies Used:** HTML5, CSS3, JQUERY, JAVASCRIPT, PHP, TWITTER API, INSTAGRAM API

##### Achievements:

- Ensured full functionality of various social media APIs in order to enable synchronized logins, content sharing features, and other forms of backlink generation in a seamless end-user process.
- Collaborated towards appealing and professional web design.
- Demonstrated excellent co-ordination and dependability

### TECHNICAL ACUMEN

HTML5 | JavaScript | PHP | CSS | TypeScript | jQuery | C | C++ | Java | Python | Bash | UNIX | ASP.NET | Angular | Bootstrap | Django | React | Node | Express | SQL | MySQL | noSQL | mongoDB | Oracle SQL | MATLAB | Assembler | IBMi | Android | CLI

---

**FURTHER NOTEWORTHY EXPERIENCE**

---

**Tutor** | Freelance**Oct. 2016 – Present**

---

**EDUCATION**

---

**Diploma, Computer Programmer and Analyst** | Seneca College**April 2019**

*Relevant Coursework:* Software Development C++ | Java | Data Structures & Algorithms | SQL Database Design Using Oracle | Design for User Interfaces | Internet Development Web Programming on UNIX | Web Programming on Windows | Information Security | Data Communications Programming | Programming in C | Object-Oriented C++ | Project Implementation | Mobile App Development | UNIX Bash Scripting | IBM Business Computing | Canadian Business Environment | Technical Writing | Database Design | Open Source Development

*Sampling of Skills Acquired:*

- **Software Development:** Applies knowledge of design methods and implementation to create effective and scalable code for diverse end-user needs. Drives whole software development lifecycle including needs analysis, design, implementation, testing, documentation, and support with ability to work in Agile environments.
- **User Stories & Needs Analysis:** Works effectively in interdisciplinary settings to collect and analyze user needs and stories, interpreting expectations into design and development goals to ensure quality deliverables. Coordinates professionally with internal and external stakeholders throughout development process.
- **Team Engagement:** Effectively engages all stakeholders including end-users and team members, discussing needs and goals to keep project development aligned with user expectations and use-cases.
